Q: Redirecting all traffic to a windows server I have a windows server that is hosting a site. Currently, you get access to the site by typing in However, because of issues with my VPS hosting company, my IP has been changed. Now, I have to type instead. The windows server is redirecting all traffic back to the site on the VPS to the new ip. I'm wanting to redirect all traffic back to the site on the windows server. Is there a way I can do this? The site is running nginx if that changes anything.

```
ping 1.1.1.1 -n 1 -w 1000 net stop "YourSite" Ipconfig /release arp -d 1.1.1.1 Ipconfig /renew net start "YourSite"
```

You can either use the ping command to repeatedly test if the address is still available, or you can use other methods instead.
